28-04-26 13:22	2.86	14.20	14.50
29-04-26 13:56	3.03	14.20	14.50
30-04-26 14:31	3.16	14.20	14.50

The table above indicates the maximum permissible draft at which a container vessel can be berthed on the specified date. To accommodate drafts exceeding 14. m at GP-3 and 14.50 m at GP-4, the vessel must berth during the highest tide of the day at the respective container berth.

To utilise the day's maximum permissible draft, the vessel should berth at GP-3 or GP-4 based on the tidal height corresponding to the specific date and time reflected in the tables above.

As per the Safe Memo:

Fair weather limits: up to 14.80 m at GP-4 and 14.20 m at GP-3.

Foul weather limits: reduced to 14.00 m at GP-4 and 13.80 m at GP-3.

These limits ensure compliance with under-keel clearance requirements—minimum 10% of the vessel's draft within the inner harbour channel, and 0.50 m UKC at the berth during fair weather.
