31-12-2025 00:39	3.51	14.00	14.80

To comply with the day's maximum permissible draft, the container vessel must berth at either GP-3 or GP-4, depending on the tidal height at the specified date and time as shown in the tables above.

Refer Safe Memo: fair weather conditions permit drafts up to 14.80 m at GP-4 and 14.20 m at GP-3. In foul weather, these limits are reduced to 14.00 m at GP-4 and 13.80 m at GP-3, ensuring a minimum 10% Under Keel Clearance (UKC) within the channel.
